Step 5 analysis evaluation

Group evaluated: _____

Your name: _____

Please provide a thorough review based on the group's Github Repository from Step 5.

How useful is the main *Readme.md* file in aiding your understanding of the group's analysis this semester?

Based on the rubric for the final GitHub for the class, what elements need the most improvement for the final product?

How detailed are the scripts provided? Do the comments help you to understand what they did?

How useful are the graphics that have been included? Are they effective?

Based on the Step 5 README page for this group, what are some analyses that the group did not do that you'd like to see added? Or perhaps some ways of visualizing their current results? Feel free to sketch them out below.

On a scale of 1-10 with 5=average, 10=truly exceptional:

Rank the organization of the group's Github repository _____

Rank the group's overall analysis and results for Step 5 _____

Thank you for your thoughtful comments and suggestions
